Landscape on an eye:

All the landscapes are photographed by the very famous artist Thomas Heaton, I tried to copy the original color palette which exists in the nature already on my eye.

Wave in a bottle:

As i am more emphasizing on the landscapes, in this i tried to create waves in some plastic bottles, basically its an installation or a sculpture which moves with the movement of your eye.

Stone painting:

As i am very much interested in exploring different surfaces, in this i used pebbles or stones as my surface and painted landscapes or seascapes on them, basically i tried to play with the texture of stones, i mixed my paintings and stone textures together.

painting:

In this i used the fire element in my paintings, as i painted some sunsets and seascapes and i tried to capture different movements in it and then i added the element of fire in it, as i am commenting on the environment that how we are destroying it.
